OIL and GAS NEWS

J. T. Sivalis, of Sivalis, Black & Fryson, was in the city from the field last night.

J. E. Crosbie, who has large holdings in the Healdton field, and who is interested in building a refinery here, was an Ardmore visitor yesterday from Tulsa.

W. L. Parish of Houston, who has been looking over the Oklahoma oil fields for several days, has returned here from Oklahoma City. He is looking for purchases in the Healdton and other oil fields of the state.

The gauge undertaken several weeks ago by the different superintendents in the field, has been finished. After the figures were classified in the office of Vern Calvert, they were totaled and sent here to the office of the Producers association. The gauge shows the total production of the field to be 47,559 barrels.

T. F. Maloney of the Maloney Oil & Gas company, was in the city last night from Wilson. He does not know yet whether his company will sell its storage oil or not, under the deal recently made for the sale of the oil.

Wirt Franklin, who was recently elected a member of the board of governors representing the different oil associations of the state, has been called to Tulsa to attend a meeting of the board.

Mr. and Mrs. G. W. Strawn of Wagoner, have been in the fields the past week for the first time in several weeks. Mr. Strawn has production in the field, and has several more wells to drill, when market conditions have improved.

Mr. and Mrs. M. W. Shriver left here yesterday for Tulsa. Mrs. Shriver will visit there with her parents and with her sister until after the New Year holidays. Mr. Shriver will return to Ardmore Tuesday.

The Snyder Oil company has arranged to drill a test well south of Red river on the Texas side, opposite Kingston. This location is east of the drilling near Dexter, which reports, emanating from Gainesville say, that some oil has been found.

W. C. McBride of St. Louis, who is one of the big oil men of the Oklahoma fields, is doubling the capacity of his oil pipe line from Dropright to Norfolk. He evidently is finding new markets and is endeavoring to meet the demands of the market by doubling the capacity of his pipe line.

The Budger Oil company has found a showing of oil south of Leon, on the Texas side at old Rock Crossing. The drill is at a depth of 370 feet. The hole is full of water and it is impossible to determine how much oil is in the hole. The company is very hopeful of bringing in a field. Col. White of this city and Dr. Friedsam of Leon own a large acreage near the well, and are interested in the outcome.

J. Howard Pew of Philadelphia was here yesterday. After visiting the Healdton fields, he came here and left for the south where he will visit Houston and other oil cities of the Lone Star state. Mr. Pew is president of the Sun company, which has a capital stock of six millions of dollars, and vastly more than that in assets. Mr. Pew said it was not his intention, at this time, to build a pipe line into the Healdton field.

J. B. Foster, of the Foster & Wrightman Oil company, left here yesterday for Tulsa. He stated before leaving that he would build his four-inch pipe line from his lease to the Magnolia tanks, that he would exercise the right of eminent domain, and would condemn the property for a right of way, and would build the line, if he had to do it under guard of federal officers. He is determined to carry out his agreement to dispose of his open storage oil, and will not silently agree to have his sales of storage oil pro-rated against his fresh oil runs.

DON'T WORRY ABOUT FIXING DINNER. GO TO CHURCH AND FROM THERE TO BOMAR DRUG STORE FOR HIS SUNDAY SPECIAL.

Notice to Auto Owners:

In the notice to auto owners appearing in Friday's issue of this paper, the notice read, "for the fiscal year ending June 30th, 1914," when it should have been, "June 30th, 1915."

This was an error, and should have read as above.

SIDNEY SUGGS,
State Commissioner of Highways

ELGIN WATCH AND

A SILVER SET

(Continued from Page One)

thousands of Chinamen, three Chinese daily papers, hundreds of Chinese stores with Chinese goods and Chinese clerks who speak good English, in San Francisco. There are thousands of things of interest in this quaint old town that are worth the trip and worth the effort you are making to get the trip for nothing.

You can take the boat to Stockton, sailing up stream on the broad waters of the Sacramento River to the mouth of the San Juan, thence up this beautiful river past the Netherlands of California (the rich garden patches stretching for a hundred miles on either side). At Stockton take a trolley to Sacramento, and if you have time, continue up through Lincoln to Marysville and back, passing through one of the most fertile and beautiful valleys in the world, or you can run down to Paso Robles and take the narrow gauge down through Santa Maria into the oil region where you can see the oil gushing out of the ground, thousands of barrels a minute.

Don't, however, let up on your work, dreaming of the beauties that are to greet your eyes when the trip is made. It's a good long pull, a strong pull and a pull all together, if you want to win. So PULL, PULL, PULL!

One young lady has it figured out something like this: (Now, don't give us away, for this is her secret). She says that she has several friends to whom she will go and sell a coupon book. She has the \$1 and also the \$5 coupon book, and she is satisfied that she will be able to sell them one of the books on some one of the merchants—there are sixteen merchants in this contest—and she can sell a book that is good for almost any kind of commodity, and then, too, she figures on taking a subscription every now and then. This girl has the right spirit, and if she will only work as she has outlined her campaign to us, she is sure to get results.

In your pulling don't forget to put forth your efforts in the way which will bring the greatest returns, namely, hustling subscriptions and selling CouponTrade Books. Thinking along these lines inspires us to the following: Can any of you write a better jingle? We just don't believe it. Try it and see—send it in and we will be pleased to print the best one received.

Oh, why should the spirit of mortal be proud,

In this world of hustle and care?

Oh why are we not rich and allowed To go free to the great World's Fair?

Without any work or effort at all

For I am so tired—and work, work I just hate!

If money only grew on trees that weren't tall,

Oh, then I could meet you at the Golden Gate.

The sun's shining brightly, I'm glad I'm alive,

I'm out selling coupons today;

I know you will take one—"sure here's a five."

Thank you, that's what my friends all say.

I've sold twenty-one this morning and believe

If I hustle both early and late

Every day that is left, I'll surely receive

A free trip to the Golden Gate.

Be sure and go around today or to-

GOOD SHINGLES PROPERLY APPLIED

still offer the conservative home-builder the best value in roofing. Where some fail to get the real worth out of shingles is in nailing them on with an inferior nail. Can't expect a 25-year shingle to give you the proper service put on with a 5-year nail. This is frequently done and the result is the shingle gets the blame—not the nail. Of course, in some instances the shingles may be at fault, but if you are careful and get shingles made of heart wood, manufactured full thickness and properly dried, you'll never have a kick coming. Let us show you shingles that are right and tell you about the nails.

morrow to Mr. Krueger's Shoe Store and see the handsome prizes that we are going to give away on the night of December 3, when the next count of votes will be made by the judges. These are prizes most anyone would be proud of, and are well worth a try.

INSPECTING PUBLIC LANDS.

Dr. Rutledge, geologist in the employ of the interior department, and Mr. McIntosh, coal and mining trustee of the Chickasaw and Choctaw nations, were both here from McAlester during the past week, inspecting the lands which the government will sell here. The coal lands lying southeast of the city will be sold outright. The coal will go with the land.

Efforts have been made to develop the property as a coal mine, and proved a failure. Segregated asphalt areas in this county and in Stephens county were visited.

Roy M. Johnson, of the Statesman, took the gentlemen out in his car. The trip to Loco, a distance of 43 miles, was made in two hours and fourteen minutes. A visit was made to the Healdton and Loco oil fields, to the asphalt mines at Woodford and also to other mines in Carter county.

Boys Are Worrying the Judge.

"I haven't much hair on my head at best," remarked Judge Freeman this morning, "and unless some of the parents in Ardmore take to looking after their children more closely, I will have none at all before my term of office as county judge expires."

The remark was prompted by some boys who have been getting into mischief for the past year and whom their parents seem to have no control of. The judge stated that he was going to give them one more chance, and the next time they were amenable to his court, that something was going to happen.
